Mathilde Perez

mathilde.perez@telecom-paris.fr   Palaiseau, France

Education

Télécom Paris, Graph Learning, Fairness in AI — Palaiseau, France, Sept 2023 – present
- Fairness constraints on evolutionary graph learning models
- Evaluation framework for biased vs. unbiased link prediction models

Université Paul Sabatier, Applied Mathematics for Engineering, Industry and Innovation — Toulouse, France, 2020 – 2022
- AI, Deep Learning, Machine Learning, Big Data, image processing
- Optimization, Statistics, Stochastic Simulations, PDEs, Signal Processing

Université Paul Sabatier, Applied Mathematics — Toulouse, France, 2017 – 2020

Lycée des Arènes, Sciences — Toulouse, France, 2016 – 2016
- Honors (Mention Bien), European English section

Publications

How Predicted Links Influence Network Evolution: Disentangling Choice and Algorithmic Feedback in Dynamic Graphs — 2026
Mathilde Perez, Raphaël Romero, Jefrey Lijffijt, Charlotte Laclau
arxiv.org/abs/2603.03945 (UAI 2026 · Spotlight presentation, ECAF 2026)

TopoFair: Linking Topological Bias to Fairness in Link Prediction Benchmarks — 2026
Lilian Marey, Mathilde Perez, Tiphaine Viard, Charlotte Laclau
arxiv.org/abs/2602.11802 (Preprint)

SimHawNet: a modified Hawkes process for temporal network simulation — 2025
Mathilde Perez, Raphaël Romero, Bo Kang, Tijl De Bie, Jefrey Lijffijt, Charlotte Laclau
10.1007/s10618-025-01119-1 (Data Mining and Knowledge Discovery)

Experience

Télécom Paris, Research Engineer — Palaiseau, France, Apr 2023 – Sept 2023, 6 months
- Simulation of temporal graphs with Hawkes processes

ISIR — Sorbonne / CNRS, Human-Computer Interaction Intern — Paris, France, Apr 2022 – Oct 2022, 7 months
- Modeling social attention through gaze in a conversational agent (Greta platform)

CerCo — CNRS, NLP Intern — Purpan, France, May 2021 – July 2021, 3 months
- Similarities between CLIP and the brain

Oral Presentations

- **SimHawNet: a modified Hawkes process for temporal network simulation** — ECML-PKDD 2025, Porto, Portugal · Slides
- **SimHawNet: a modified Hawkes process for temporal network simulation** — CAp 2024, Paris, France
- **How social media algorithms reinforce inequality** — EUNIC Science Day, Madrid, Spain · Slides

Skills

Programming
Python, PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, C/C++/C#, R, LaTeX, Unity, Java

Machine Learning & AI
Graph Learning, Deep Learning, Fairness in AI, Temporal Graphs, Hawkes processes

Soft Skills
Teamwork, Public speaking, Autonomy

Languages

French
Native

English
Intermediate
